

**NOW SFI 29.3  
APPROVED!!**

# **BD Cummins Flex Plate**

## **For 1994-2009 Dodge Ram Diesel Trucks**

<b>1041210</b>	<b>Dodge 5.9L Cummins</b>	<b>1994-2006</b>
<b>1041220</b>	<b>Dodge 6.7L Cummins</b>	<b>2007½-2009</b>

**PLEASE READ ALL INSTRUCTIONS BEFORE INSTALLATION.**

- 2 times thicker than stock
- Manufactured using 1045 Billet forge.
- 300% less radial run-out compared to other aftermarket flex plates
- SFI 29.3 approved for high horsepower diesel applications
- Not affected by hydrogen embrittlement which can drastically reduce strength.
- 350% better fatigue strength than aluminum
- Correct ring gear that won't damage starter.
- Fits with any size torque convertor (OEM or Aftermarket)

**\*\* Cautionary Note \*\***

***Please read the disclaimer before proceeding to install this unit. Do not install unit if you do not agree with the disclaimer.***

## **Installation**

1. Remove the factory flex plate and the large steel washer.
2. Install the BD Flex plate, reusing the factory steel washer. Tighten the 8 factory bolts in a criss-cross pattern, to the factory torque specifications described below.

### **Factory Torque Specifications**

Flexplate to Crank	<b>101 lbs-ft</b>	Flexplate to Torque Converter	<b>33 lbs-ft</b>
--------------------	-------------------	-------------------------------	------------------

SFI 29.3 certifications are good for 3 years from the date of manufacture. The manufactured date can be found on the SFI sticker.
